Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 102, 103, 105 and 124 are rejected under 35 U.S.C. 102(b) as being anticipated by Warne.

There is disclosed in Warne a brewing apparatus, comprising: a heating element 44; a plurality of valves 64, 70, 82; a manual control system 42 comprising: means 104, 106, 108, 110, 112, 114 for selectively operating the apparatus in accordance with a "normal" operations mode in which the heating element and the plurality of valves may be operated in accordance with a normal operation program; means 104, 106, 108, 110, 112, 114 (same as above but used with secondary functions) for selectively operating the apparatus in a "program mode" in which operational parameters are changed (col. 13); a "self-diagnostic mode" (col. 13, lines 41-43); and a demonstration mode in which different water delivery pulses may be used; and a display panel 100.

Allowable Subject Matter

Claims 1-6, 8-26, 28-31, 33, 37-39, 91-93, 97-99, 101, 104, 106 and 108-123 are allowed.

Response to Arguments

Applicant's arguments filed 11 April 2007 have been fully considered but they are not persuasive. Applicant argues that the Warne reference fails to make mention of a "demonstration mode". The demonstration mode has been cited in the rejection as being the mode in which different water pulses may be used. Applicant has failed to structurally differentiate the claimed demonstration mode from the prior art modes of operation. It should also be noted that applicant's attempt to use operational language to define the various modes, is not structurally limiting.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
